

KIS

Key Information Summary

<http://www.palliativecareggc.org.uk/>

Euan Paterson
GP Palliative Care Facilitator (Glasgow)
07792120108
euan.paterson@ntlworld.com

Agenda

- Who is using KIS already?
- What is KIS for?
- KIS benefits?
- KIS concerns?
- Who should have KIS?
- What information does KIS contain?
- How to use KIS
- Future...

What is KIS for?

- Information transfer
 - ‘In hours’ GP > OOH GP
 - GP > District Nurse
 - Primary Care > A/E & Acute Receiving Units
 - Primary Care > Scottish Ambulance Service
 - Primary Care > Specialist Palliative Care Centres
- Prompts for proactive care
- Anticipatory Care Planning
- e-Referral to Specialist Palliative Care
- All data stored in one place
- Structure for lists, meetings etc
- (Palliative Care DES)

KIS benefits for patient & carer?

- Targets a very vulnerable and needy group
- Encourages earlier identification
- Upstream of 'last stages of life'
- Encourages anticipatory care planning
- All professionals have better information
- Fewer inappropriate actions
 - Transfer
 - Admission
 - Futile attempt at CPR
- Reassurance and 'security'
- Better and safer care

KIS benefits for general practice?

- In hours
 - Natural extension of Gold Standards Framework
 - Better than ePCS
 - Simple information transfer
 - More effective
 - Less work
 - Fits in with palliative care DES
- Out of hours
 - Increased quantity and quality
 - Information
 - Patients
 - Less patient contacts(?)

KIS benefits for NHS?

- Better service
 - Information transfer
 - Increased pro-activity
- Fewer inappropriate actions
 - Admissions
 - 999 ambulances
 - Futile CPR
- Decreased OOH contacts(?)
- Save money

KIS concerns?

- Different systems
 - INPS / VISION – very different
- Data entry
 - Possible duplication
 - Visiting – particularly ‘on the way home’
 - Data entry OOH
 - Own GP
 - OOH GP
 - Data entry by AN Other...

KIS concerns?

- Data transfer
 - Remembering to obtain consent(!)
 - Consent model
- Access
 - Read access
 - SAS call handlers do not have access
 - Possibly changing
 - Write access
 - Restricted (more or less) to in-hours GPs
 - Knowledge of access rights...

Who should have KIS?

- Not just for palliative care!
- Patients with supportive / palliative care needs
 - Whoever YOU feel should be included!
 - Palliative care register
 - GSF register
 - SPICT / GSFS prognostication guidance?

Supportive and Palliative Care Indicators Tool (SPICT™)

The SPICT™ is used to help identify people whose health is deteriorating. Assess them for unmet supportive and palliative care needs. Plan care.

Look for any general indicators of poor or deteriorating health.

- Unplanned hospital admission(s).
- Performance status is poor or deteriorating, with limited reversibility. (eg. The person stays in bed or in a chair for more than half the day.)
- Depends on others for care due to increasing physical and/or mental health problems.
- The person's carer needs more help and support.
- The person has had significant weight loss over the last few months, or remains underweight.
- Persistent symptoms despite optimal treatment of underlying condition(s).
- The person (or family) asks for palliative care; chooses to reduce, stop or not have treatment; or wishes to focus on quality of life.

Look for clinical indicators of one or multiple life-limiting conditions.

Cancer

Functional ability deteriorating due to progressive cancer.
Too frail for cancer treatment or treatment is for symptom control.

Dementia/ frailty

Unable to dress, walk or eat without help.
Eating and drinking less; difficulty with swallowing.
Urinary and faecal incontinence.
Not able to communicate by speaking; little social interaction.
Frequent falls; fractured femur.
Recurrent febrile episodes or infections; aspiration pneumonia.

Neurological disease

Progressive deterioration in physical and/or cognitive function despite optimal therapy.
Speech problems with increasing difficulty communicating and/or progressive difficulty with swallowing.
Recurrent aspiration pneumonia; breathless or respiratory failure.
Persistent paralysis after stroke with significant loss of function and ongoing disability.

Heart/ vascular disease

Heart failure or extensive, untreatable coronary artery disease; with breathlessness or chest pain at rest or on minimal effort.
Severe, inoperable peripheral vascular disease.

Respiratory disease

Severe, chronic lung disease; with breathlessness at rest or on minimal effort between exacerbations.
Persistent hypoxia needing long term oxygen therapy.
Has needed ventilation for respiratory failure or ventilation is contraindicated.

Other conditions

Deteriorating and at risk of dying with other conditions or complications that are not reversible; any treatment available will have a poor outcome.

Kidney disease

Stage 4 or 5 chronic kidney disease (eGFR < 30ml/min) with deteriorating health.
Kidney failure complicating other life limiting conditions or treatments.
Stopping or not starting dialysis.

Liver disease

Cirrhosis with one or more complications in the past year:

- diuretic resistant ascites
- hepatic encephalopathy
- hepatorenal syndrome
- bacterial peritonitis
- recurrent variceal bleeds

Liver transplant is not possible.

Review current care and care planning.

- Review current treatment and medication to ensure the person receives optimal care; minimise polypharmacy.
- Consider referral for specialist assessment if symptoms or problems are complex and difficult to manage.
- Agree a current and future care plan with the person and their family. Support family carers.
- Plan ahead early if loss of decision-making capacity is likely.
- Record, communicate and coordinate the care plan.

Who should have KIS?

- Not just for palliative care!
- Patients with supportive / palliative care needs
 - Whoever YOU feel should be included!
 - Palliative care register
 - GSF register
 - SPICT / GSFS prognostication guidance?
 - Chronic disease registers?
 - Care Home patients?
 - Housebound patients?

What information does KIS contain?

- Patient
 - Core details – name, address, telephone number, CHI
 - Contact Numbers
 - Carer details
 - Next of kin
 - Access information – key holder & address instructions
- Practice details
 - Core details – registered GP, usual GP

What information does KIS contain?

- Special Note
 - Possibly the most important field
- Relevant Past Medical History
 - Populated from Problem List
- Palliative Care and Treatment
- Agency Contact / Other Agencies Involved
 - Drop down pick list
- Capacity issues
 - Guardianship
 - Power of Attorney
 - Adults with Incapacity form

What information does KIS contain?

- Planning issues
 - Single Shared Assessment
 - Self management Plan
 - Anticipatory Care Plan
 - DNACPR
 - CYPADM
 - Oxygen
 - Additional drugs available
 - Syringe pump
 - Preferred Place of Care
 - Preferred Place of Final Care (V)

What information does KIS contain?

- Equipment
 - Moving and Handling
 - Catheter and continence
- OOH arrangements
 - Do patient/carer know what to do?
 - Will GP issue death certificate
 - Is GP to be contacted OOH?
- Patient / Carer Understanding
 - Diagnosis
 - Prognosis
- Contractual
 - Palliative Care Register

How to use KIS – EMIS

- Decide who should have one
- Consultation mode / 8-KIS

Future...

- eHealth vision
 - Extending access
 - Patients
 - Wider professional groups
 - Improving accuracy/completeness of summary information
 - Integrating clinical and patient generated information
 - Ensuring systems fit for purpose
 - Ensuring information governance issues adhered to

Future...

- Short term
 - Access for Hospices
 - Improve use of KIS
 - Improve access to ECS/KIS for professional groups who are allowed access
 - Enable wider professional access to ECS/KIS
- Current areas of work
 - Optimising access and usability of KIS
 - Improving access to ECS/KIS
 - Anticipatory Care Planning improvement
 - Looking at what is needed
 - Linking to Recommended Summary Plan for Emergency Care and Treatment (ReSPECT)
 - Linking to HIS Scottish ACP template

Future...

- Long term
 - Digitalising and interlinking key records in health and social services
 - Making summary health information available to all citizens through a patient portal
 - Establishing requirements for an integrated End of Life/ACP summary
 - Replacing summaries obtained through ECS/KIS with a summary drawn from multiple clinical systems
 - Bidirectional functionality of professional portals(!)
 - Bidirectional functionality in the patient portal(!!)
